OBJECTIVE

I understand about how motorcycles work. I also understand the structure, how to work according to established procedures, and discipline towards regulations. I have an interest in learning technology and information, currently I have mastered the basics of several programming languages such as C++, java, python, html, css. I can also build and configure a network using Cisco software. I'm currently studying cloud computing. I have commitment, responsibility, and the ability to adapt to any situation and condition.
